

Artimax[®] Zerocks[®] Base

Difference is meaningful only when it is
PRACTICAL & ECONOMICAL

**Crowns & Bridges are Dimensionally more Accurate
on a Zero-expansion, Polymer Base**

**Coming
soon**

1 Drill pinholes exactly where you want on this Polymer base

conventional method of pin drilling on target point
by laser guidance can now take on new meaning
with the zero expansion model base

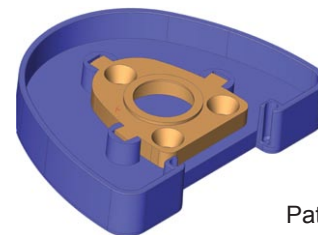

2 Works with most popular setting machines

Allows you to use your current pin setter
No need to purchase an expensive specialty machine

3 Magnet or Magnet-less connection

Options of either classical magnet connection or
more economical and handier magnet-less connection to metal / semi-adjustable articulators
